This whitepaper is a living document and will be regularly updated as the development of the platform continues.

Any information listed here could be altered and values updated but the core structure will stay the same and all major changes will be announced on all our social handles

INTRODUCING MY FARM PET

MyFarmPet is a blockchain farming game, where anyone can buy and own virtual farms, farm pets, and meet new friends.

The game combines the best of the two worlds - a fun narrative for regular game lovers who want to enjoy the gameplay experience as well as an ecosystem for farmers who want to collect and trade farm pets and egg **Non-Fungible Tokens** (NFTs).

My farm pet is not just a game for blockchain players but it is a game that could introduce blockchain to millions of players.

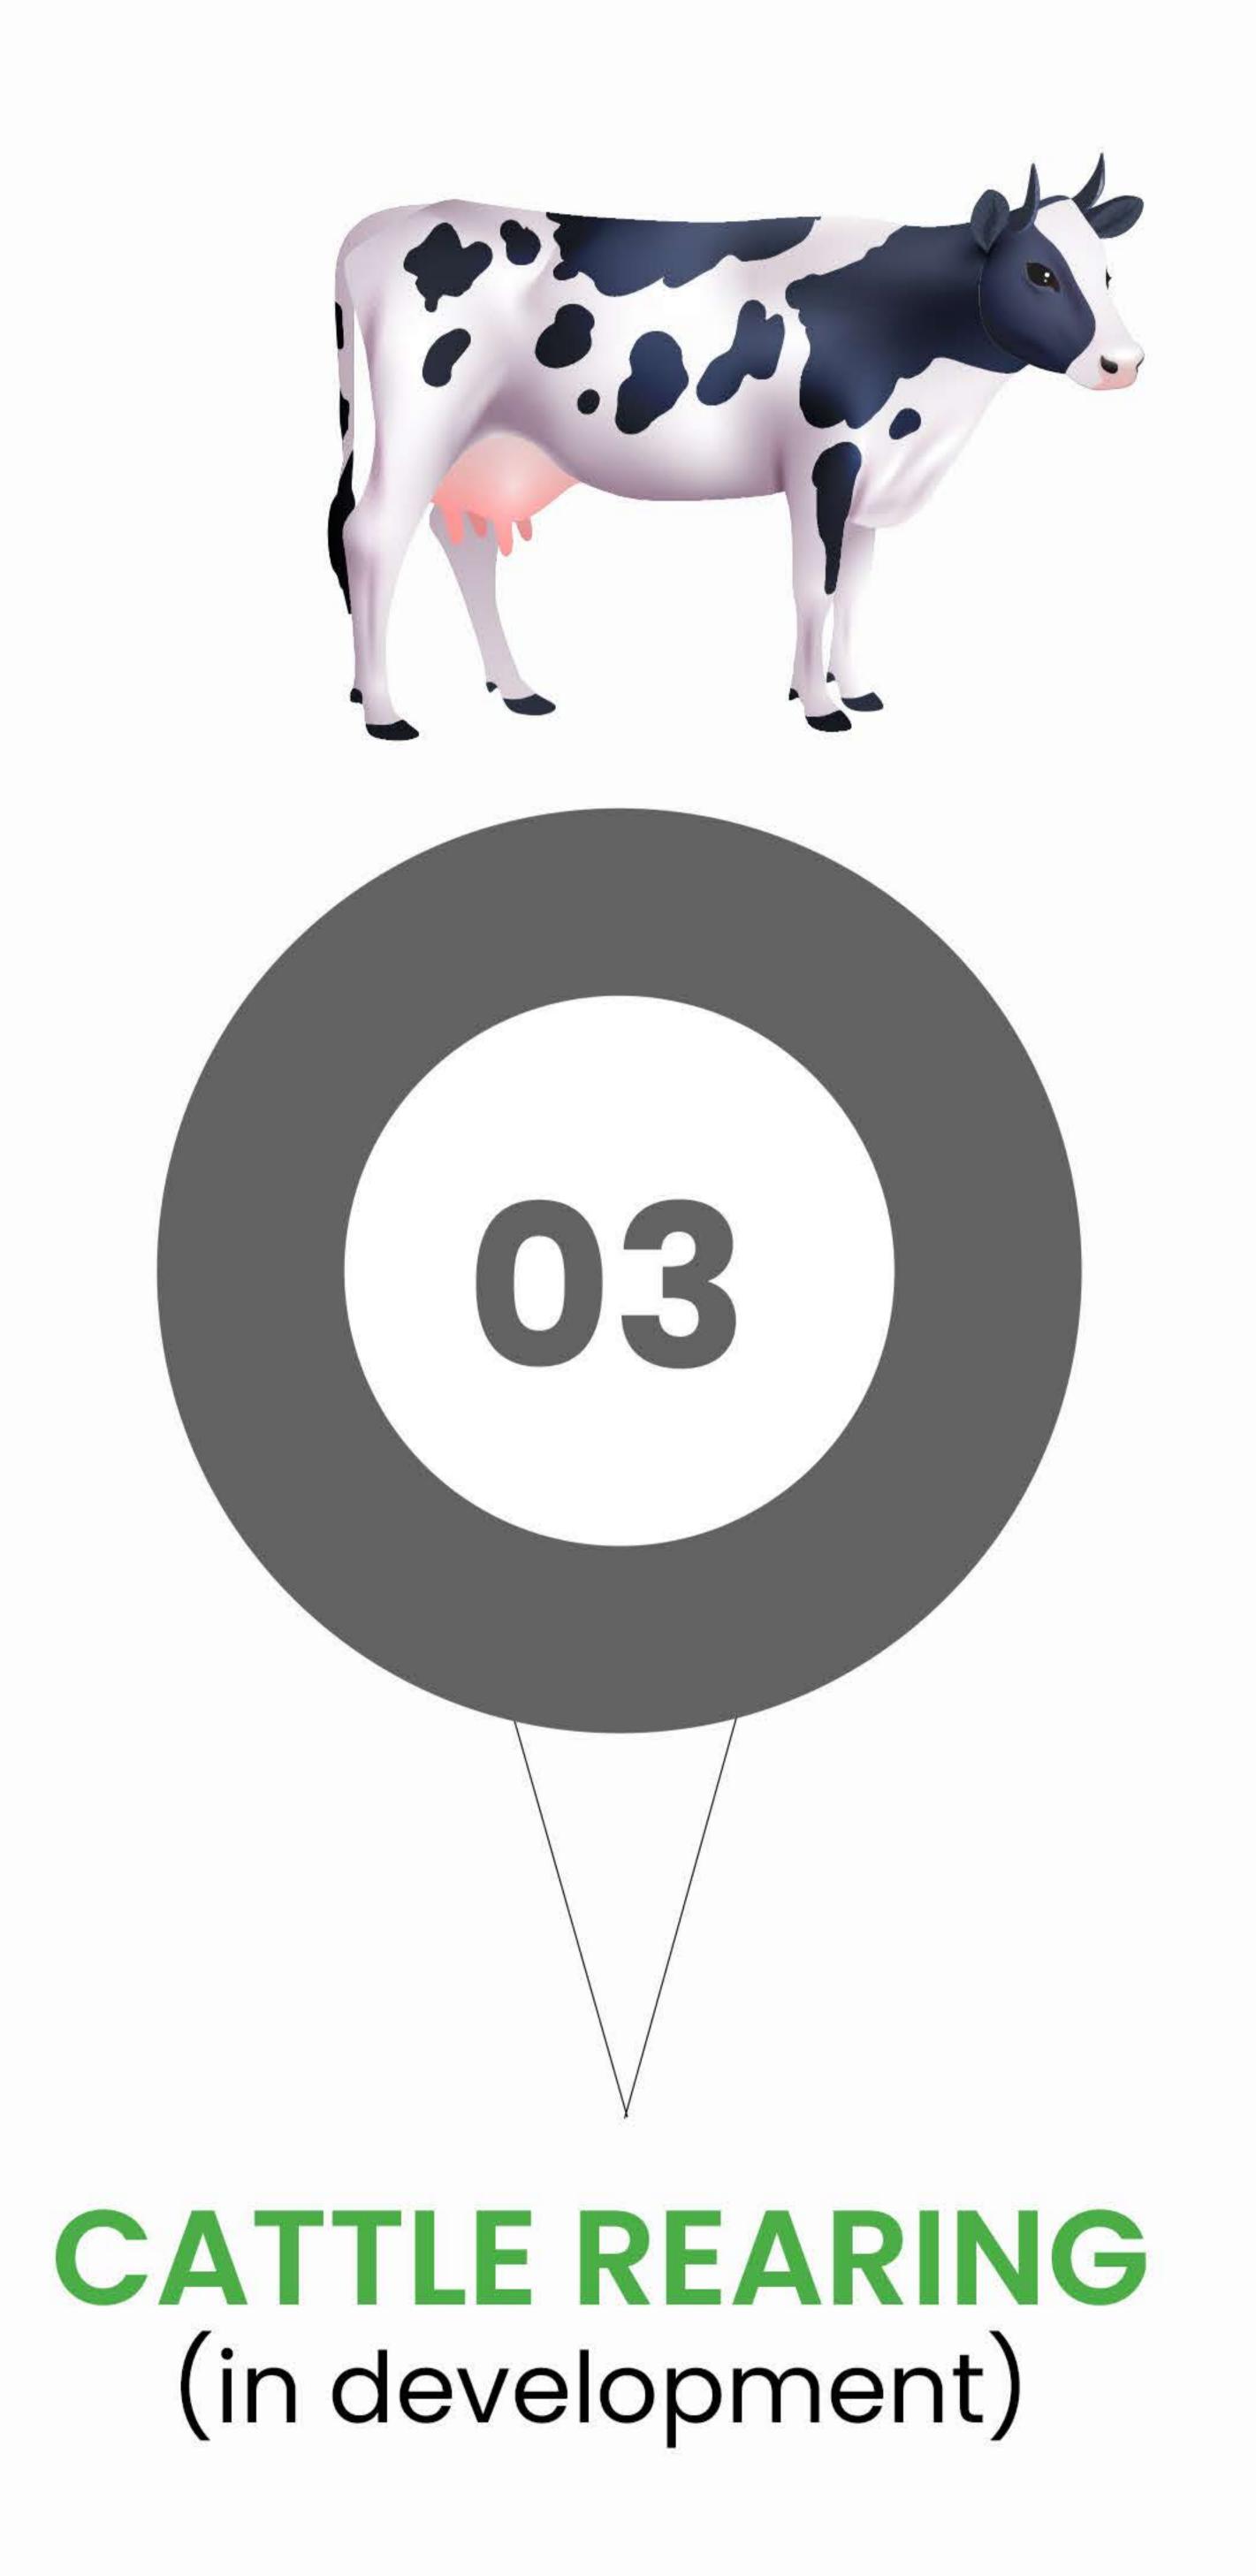

An open-world 3D game with a strong visual identity based on positive images and cuteness intended for both skilled and Unskilled blockchain players.

MY FARM PET MODULES

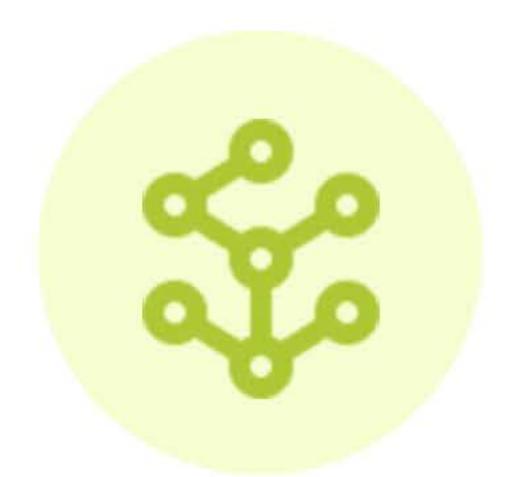

MY FARM PET FEATURES

Blockchain-Based:

My farm pet develops her game economy on the blockchain to reward players as they participate in the game. Blockchain enhances the transparency of all transactions.

Decentralized ownership through NFT-based assets:

Decentralized ownership of in-game assets such as farms, chickens, eggs, etc.

Social features:

In-game chat modules allowing farmers to communicate with people on the platform, and to transfer tokens and assets to friends in the chat.

Marketplace:

In-game marketplace allowing users to buy and sell their assets. It provides more liquidity and financial incentives for gamers to purchase and create items in the game.

Referral Scheme:

Farmpet token holders can earn additional income from the referral scheme. Refer a friend and earn 5% of his total spend on the NFT marketplace.

IN-GAME PROCESS (CHICKEN FARM)

The in-game experience begins with the collection of limited in-game items such as building, cage, and pets(chicken) which are represented in the form of NFT tokens.

Only 5,000 chickens (a hen) will be minted after which no more will be minted. The chicken will lay one egg daily which can be sold on the marketplace.

New players will have to buy eggs and place them in the incubator for a 21day incubation period. At the end of the 21-day incubation, chicks should be feed and allowed to develop for a 40day period after which they can begin to lay eggs.

All eggs on the marketplace will be sold at a fixed rate except in periods of scarcity. For proper development, chickens require monthly feeding consumption of **600grams** of pellets which will be available on the marketplace.

Fully developed chickens are expected to lay a minimum of **360eggs** annually while each egg will be sold for **\$0.3** worth of farmpet tokens which presents good returns on investment for NFT holders

Participants in the game profit from;

- Sale of NFTs such as building, cage, chickens, eggs, etc
- Players incentives as milestones are accomplished
- Voter incentives as they have prime voting rights
- Rewards in Bnb from Live farm proceed.

NB: land cost **\$100** for **100sqm**. 100sqm can accommodate 100chickens only

Land and chicken are NFTs that can be sold on the marketplace.

MONTHLY EXPENSE TO BE INCURRED

Chicken feed 600grams of pallet for 1month @ \$1 (80chickens: \$1* 80)

\$80

Monthly Revenue:

1 chicken produces 30eggs monthly, 80 chickens will produce: (80*3)

=2,400 Eggs

An egg cost \$0.12 (2,400eggs * \$0.12)

=\$288

Return on investment in 12months is;

\$288*12 = \$3,456

IN GAME PROCESS (PIG FARM)

Pig farming in-game process

The game process begins with the acquisition of land (100sqm can contain 11pigs only)), a boar, and a sow. The boar and soar will aid the reproductive process. I pig can only mate with 10sows.

On launch, **300 boars and 3,000 sows** will be minted after which no more will be minted. Pigs will be purchased from the NFT marketplace.

The sow gives birth to one piglet weekly. These piglets have to be weaned and well fed for a period of 90days before they are capable of reproducing.

Piglets can be put up for sale on the market place 7days after delivery. New players can acquire these piglets to continue the breeding process.

\$1,300

Total

THE ESTIMATED MONTHLY ROI FOR \$1,400 IN MYFARMPET PIG FARM IS \$400 (AROUND 30%)

Expenses:

Pig (Boar)	\$100
Pig (sow) (\$100*10)	\$1000
Land (pigsty)	\$200

NB: The land(pigsty) costs \$200 for 100sqm and can accommodate 11pigs only.

Land and pigs are NFTs and can be sold on the marketplace.

MONTHLY EXPENSE TO BE INCURRED

1 pig consumes 600grams of pellet.600grams of pellets cost \$5. (11 pigs: 11* \$5)

\$55

Monthly Revenue:

1 sow reproduces 4piglets monthly, 10 sows : (10*4piglets)

= 40piglets monthly.

Each piglet cost \$10, (40piglets * \$10)

= \$400

Return on investment in 12months is;

\$400 * 12 = \$4800

MY FARM PET IN-GAME TOKEN

My farm pet (farmpet) native utility token is used in the following functions:

in-game Currency: ————
Purchase assets and feeds in the game and my farm pet marketplace.
Governance:
Participate in the governance process through a Decentralized Autonomous Organization (DAO), and vote on
mprovement proposals and platform developments (e.g. platform operations and development).
Voter incentives will be introduced to encourage voter participation.
Staking: ————
Stake Farmpet tokens to earn a percentage of platform revenues (e.g. land sales, asset sales, and transaction fees).
10% monthly APY is offered.
Player Incentives:
Top farmers earn farmpet tokens. This design is to encourage user participation in the game and to maintain traction

With our recommendation program, you can earn additional farmpet tokens by inviting friends and acquaintances to the My farm pet .

As soon as one of the friends you have invited makes a purchase, you will receive a commission of 5% terms and condition applies

MY FARM PET REVENUE MODEL

- My farm pet generates in-game revenue from the sale of NFTs on the NFT marketplace and the profits from her Live farm
- Generated revenue from the sale of NFTs will be invested back into the project for further development towards the completion of more milestones and the financing of the live farm project.
- The live farm generates revenue which enables us to perform a buy back and reward Farmpet holders in BNB.

MY FARM PET ROADMAP

Chicken farm Game development
Creation of social communities
Token launch and listing on pancake
Staking launch
Chicken farm launch
In-game Marketplace auction
Commencement of pre farming activities

Marketing campaign launch
Ambassadorial campaign launch
Listing on centralized exchanges
DAO integration
In-chat feature integration
Farming activities on live farms commencement

Pig farming launch

Cattle farming launch

Integration of more chains

This roadmap is still subject to further updates.
