Starbound Snapshot

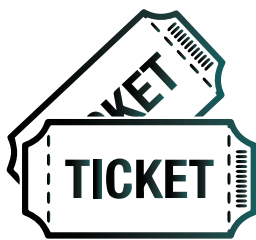

A new De-Fi Token with groundbreaking and unique features. Our Starbound ship has been designed with 2 key factors mind, safety and longevity! Join us in our journey to colonize the stars for the LONG term with an experienced team leading the way with tons of unique and improved utility functions!

Passive BNB Rewards to incentivize holding throughout your journey..

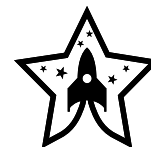

Anti Sniper / Anti Bot Measures Taken at launch with the assistance of the top sniper and bot coders on the BSC.

EXCLUSIVE Ship Ticket Feature - Early investors get tickets that place them in a bonus tokenomics reward pool! Each week a very limited number of additional tickets will be given as well!

Doxxed Members and a team with years of Crypto experience. PLUS HUGE unreleased utility backends one of which NEVER seen on the BSC!

About Starbound.

INTRODUCTION

The Starbound Project is a fully customized smart contract designed to implement popular BNB Passive Rewards features with the addition of a unique “Ship Ticket Holder” incentive built within the underlying tokenomics structure. The Starbound Project spent the better half of the past two months developing a robust ecosystem dubbed our “Star System”, which will provide the native token (\$SBD) with an immediate utility case upon launch. The Starbound Project’s Star System, which is built within the primary Starbound website, will include a passive BNB Rewards Dashboard, StarSwap, and an Equity Traded Fund (ETF) as a tokenized wrapped asset class. In the future, the Starbound Project will add a full IDO Launchpad, i.e. StarLaunch, soon after our successful launch on PancakeSwap (PCS) on Sunday, 15 August 2021.

WHY STARBOUND?

The Starbound Project is one of the only projects on the Binance Smart Chain (BSC) to include a robust ecosystem of utility upon launch. A majority of cryptocurrency projects on BSC contain no utility case and/or have no intention on developing a utility case despite plans and statements to the contrary. For this reason, the Starbound Project decided to develop an ecosystem of utility before our public debate on PCS on Sunday, 15 August 2021 to give our investors an immediate realized Return on Investment (ROI). In addition to Star System, Starbound’s native token (\$SBD) has popular BNB Passive Rewards to include a unique “Ship Holder Ticket” for a select group of early investors. As a result, Starbound is a truly unique project offering a robust value proposition that can’t be matched anywhere else on the Binance Smart Chain.

CONTRACT OWNERSHIP

The Starbound Project did not renounce ownership of the smart contract because the Starbound Management Team must maintain the ability to change and/or modify the contract in the future in the event we need to fix any unforeseen issues that we may experience as we grow as a community. We keep the smart contract in our custody to improve upon the functions for the benefit of the community – not ourselves. There are a select number of projects on the Binance Smart Chain that publicly renounce their contract ownership as part of a ploy to create a false sense of security, i.e. “funds are safe” for the community, but this is not who we are or what we believe in as a management team. We have no plans to renounce ownership of the contract – period.

The Star System Utilities

The Starbound Project will launch three built-in utilities upon launch including, but not limited to the BNB Passive Rewards Dashboard, StarSwap, and the Equity Traded Fund or "ETF" token. The BNB Passive Rewards Dashboard, StarSwap, and ETF are the beginning of the "Starbound Ecosystem", which will eventually include a built-in IDO Launchpad named "StarLaunch". The Rewards Dashboard, which is built within the Starbound Project's main website, will provide users with an up-to-date look at their BNB passive rewards garnered from holding the native token in an all-inclusive interface.

StarSwap, which is a swap that will include the ability to trade wrapped tokenized assets, will provide our users with an alternative to PCS with lower trading fees at a rate of approximately of 0.20 percent per trade. Finally, Starbound will introduce a tokenized ETF, which will include wrapped digital assets containing several "slices" of other digital assets therein resembling an ETF. The approximate fund distribution of the ETF, weight per asset class, and underlying structure of the fund will be released soon after our public launch on PCS on 15 August 2021.

LAUNCHPAD

The most cost effective and first launchpad to reward SBD holders with the launchpad tokens, essentially getting you into presales for FREE just for holding SBD! Will have a safe and easy to use interface with top tier anti-bot and snipe implemented.

ETF (Exchange Traded Fund)

Our ETF is the combination of coins that make one ETF token. It would consist of different percentages of each coin to make the full 100% holding. That ETF TOKEN is wrapped and ready to swap on the Binance Smart Chain. Starbound has made it easy for holders to hold ALT COINS without going through the hassle of having to swap BSC or BNB into the central exchange, and keeping your funds on DeFi to buy tokens such as Bitcoin, Ethereum, Matic and Cardano. We would be choosing the leading coins to be wrapped as the ETF token. Are you holding ETF tokens? Yes? Bam! You are now holding value of the Alt Coins without having to do anything outside of Starbound.

STAKING

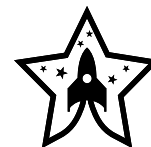

We will offer a unique staking system where instead of rewarding in native tokens, stakers can be rewarded with our ETF tokens of your choice! This way your rewards are dispersed within typically less volatile major altcoins and crypto.

CHARITY

Starlight Children's Foundation is a charity the Starbound Finance team holds very close to their hearts. Every minute of every day child or young person is admitted to hospital across Australia. Starlight help kids of all ages regardless of disability, injury or illness because what happens in childhood lasts a lifetime. Starlight believes in happiness because it matters to sick kids' health.

NFT GAME

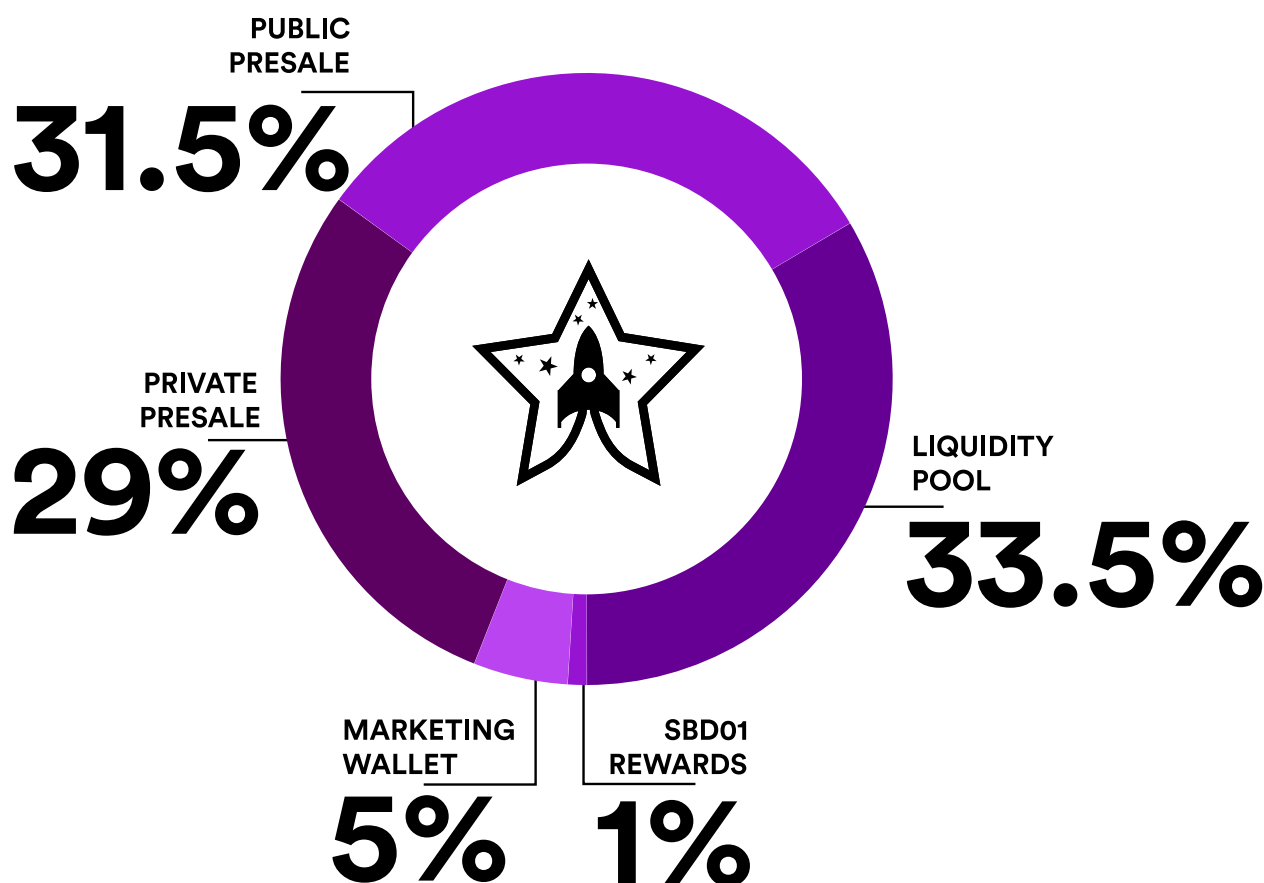

Currently in development. More details released in Q4 of 2021

The Starbound Tokenomics

Name:	Starbound Symbol: \$SBD		
Contract:	0x3bf7e66b905bf2aaa08c45f0bdab0c4b26c36d4a		
Decimals:	9	Minimum:	0.5 BNB
Total Supply:	1,000,000,000	Maximum:	2.0 BNB
Dev Wallet:	N/A	Presale \$:	394,250
Presale:	8th August 2021	PCS \$:	373,500
Hardcap:	800 BNB	Liq Locked:	1st January 2030

Further more, please note that the Starbound Management Team does not maintain any founding tokens and/or dev wallets. Prior to our public launch, an established community of cryptocurrency traders – CRYPTOZIN – funded the initial seed round of investment as part of a private presale totaling approximately \$120,000 USD in addition to a public pre-sale, which ran from 08 August to 15 August 2021. The native \$SBD token will launch on PancakeSwap (PCS) following the end of the public presale. The total supply of \$SBD is approximately 1,000,000,000 tokens. The Starbound Project will not lock the marketing wallet prior to launch and/or immediately thereafter in an effort to maintain full operational and scaling momentum following the public launch on 15 August 2021.

The Starbound Roadmap

Phase 1

- Discord Community
- Flightplan Design
- Website and Telegram Launch
- Project Engine Start-up

Phase 2

- Ship Audit Application
- Private Sale Commences
- Ship Utility Unveiling
- Pre-sale Filled Up

Phase 3

- Starbound Launch
- CMC and Coingecko Applications
- Aggressive Social Media Marketing
- Launchpad Initialisation

Phase 4

- Major Project Partnerships
- ETF Marketing
- Charities and Foundations
- Galactic Exploration

WE ARE ALL PART OF THE TEAM!

The creation of Starbound was inspired by a community that stands together, works together and builds an empire in the Stars. We all need to play our role and spread the word, grow the brand and build awareness!

The Starlight Foundation

Starlight Children's Foundation is a charity the Starbound Finance team hold very close to their hearts. Every minute of every day child or young person is admitted to hospital across Australia. Starlight help kids of all ages regardless of disability, injury or illness because what happens in childhood lasts a lifetime. Starlight believe in happiness because it matters to sick kids' health.

STARLIGHTS MISSION

At Starlight we know that happiness matters to sick kids facing the pain, fear and stress of serious illness. That's why for over 30 years we've worked in partnership with health professionals to bring the fun, joy and laughter that helps sick kids be kids. We help kids of all ages regardless of disability, injury or illness because what happens in childhood lasts a lifetime.

We believe in happiness because it matters to sick kids' health.

BRINGING HAPPINESS TO SICK KIDS AND TEENS

From one Starlight Wish granted more than 30 years ago, we now create over half a million Starlight Experiences to sick kids each year.

All of those experiences are based on the needs of seriously ill children and young people. Our programs are supported by research and evaluation to ensure excellence in everything we do. Starlight is Australia's broadest reaching children's charity and recognised as an integral part of the healthcare system.

PUTTING THE HAPPY BACK INTO CHILDHOOD

Fun and play are essential to every childhood. When serious illness takes that happiness away, Starlight is still there.

- We give sick kids the fun and happiness that has a lasting positive impact on their lives.
- Here's how Starlight's programs make a difference:
- Sick kids are distracted from their illness, pain and treatment
- Sick kids feel happier and more in control
- Sick kids can better manage their pain

We're serious about fun because we see the impact it creates on kids in hospitals and communities across the country every day. When you give to Starlight, you're helping sick kids feel happier, more confident and ready to face life's challenges.
